

Poznań Becomes the Center of Modern Logistics!

From June 3 to 5, 2025, the MTP Poznań Expo will transform into a place where technology meets logistics. MODERNLOG will bring together industry leaders who will showcase innovations in automation, warehousing, and supply chain management. This is where the future of logistics will be shaped.

Logistics 4.0 is no longer a vision—it is a reality shaped by artificial intelligence, robotics, and digital warehouse management systems. At MODERNLOG, participants will see firsthand how these technologies are revolutionizing logistics operations.

Innovations in Logistics and Warehousing

During MODERNLOG, state-of-the-art solutions supporting warehouse automation will be presented, including internal transport technologies, storage systems, packaging and identification solutions, WMS software, and logistics services.

Among this year's exhibitors, there are already companies offering: dedicated software for logistics process management and warehouse optimization, warehouse racks, pallets, transport and storage containers, e-commerce packaging, protective barriers, and warehouse space marking and security solutions. A significant group of exhibitors includes companies from the warehouse automation sector, e-commerce logistics, and forklift truck manufacturers.

Market leaders such as Gawroński, Reesink Logistics Solutions, Sparck Technologies, WDX, Craemer, Kardex, ISL – Innowacyjne Systemy Logistyczne, PSI, Elmetal, Modula Polska, Cassioli Polska, Anter System Polska, Packsize, and Linde Material Handling Polska have already confirmed their participation in MODERNLOG 2025. And these are just some of the exhibitors whose product innovations and cutting-edge solutions will be showcased during the event.

Innovative logistics solutions will also be presented in special zones: In4Log, Start-Up Smart Warehouse, E-Commerce Zone, Developer Zone, Safety Zone, and on the Partner Stage.

Who Will You Meet at the Fair?

Every year, MODERNLOG attracts logistics industry leaders, transport specialists, distribution center operators, as well as representatives of the e-commerce and omnichannel sectors. Among the visitors are experts from the FMCG, automotive, furniture, and construction industries.

In 2024, the MODERNLOG, ITM, and Subcontracting trade fairs welcomed nearly 15,000 visitors.

A Unique Business Platform

MODERNLOG is a unique opportunity to explore the latest trends in logistics, present your offer to a wide audience, and establish valuable business connections. The event is designed for both large logistics enterprises and smaller companies seeking modern solutions.

MODERNLOG takes place alongside ITM Industry Europe and the Subcontracting Trade Fair. The shared space for these events creates a broad platform for experience exchange between industry, logistics, and new technology representatives.
